

WCDHB MHS Service Provision Framework MHS Focus And Function

Version

1

To provide mental health specific comprehensive assessment, treatment and rehabilitation for adults with moderate to severe mental illness who are resident on the West Coast, which will meet MoH Mental Health Sector Standards, best practice guidelines and other legal requirements.

The services provided are client centred and delivered in a manner that upholds the principles of recovery, by ensuring that the person's choices and preferences are central to care and discharge planning, goal setting and reviews of their treatment. The service ensures that there is collaborative input from family/friends and an emphasis on relapse prevention and management, crisis planning and advance directives.

Clinical process ensure continuity of care through the use of one integrated, confidential clinical file, an approach that is culturally appropriate, least restrictive and empowers client increase their control over their mental health and enables them to participate fully in society. Where possible clinical processes are completed collaboratively with the client, including the clinical notes.
